#### REINFORCEMENT BAR ALUMINIUM

To avoid deformation of the lids, it is necessary to install the reinforcement bar in the module where the basin will be supported. Um eine Verformung der Abdeckung zu vermeiden, ist es notwendig eine Waschtischplatten-Stabilisierung in dem Modul zu installieren, auf dem das Waschbecken aufliegt. Per evitare la deformazione del piano, è necessario installare la barra di rinforzo nel modulo dove il lavabo sarà sostenuto.

## COMPACT NATURAL STONE

# STONE.COMPACT

### Closer to nature.

The new Stone Compact range of basins and plinths countertops is made from **natural compact stone**, which provides a level of strength and durability superior to other materials. The external coating protects it from all kinds of external agents and ensures that the texture, colour and feel of the stone is kept intact. It also prevents stains and makes cleaning easier, allowing the use of any cleaning products, however aggressive they are. Nevertheless, it is always recommended to use neutral products and non-scratch sponges.

### Die Natur näher bei dir.

Die neue Stone Compact-Reihe von Waschbecken und Arbeitsplatten besteht aus **natürlichem Kompaktstein**, der eine höhere Festigkeit und Haltbarkeit als andere Materialien bietet. Die äußere Beschichtung schützt vor äußeren Einflüssen und bewahrt die Textur, Farbe und Haptik des Steins. Sie verhindert zudem Flecken und erleichtert die Reinigung, sodass auch aggressive Reinigungsmittel verwendet werden können. Es wird jedoch immer empfohlen, neutrale Produkte und nicht scheuernde Schwämme zu verwenden.

### La natura più vicina a te.

La nuova gamma Stone Compact di lavabi e piani di lavoro è realizzata in **pietra compatta naturale**, offrendo una resistenza e una durata superiori rispetto ad altri materiali. Il rivestimento esterno protegge da agenti esterni e mantiene intatti la texture, il colore e il tocco della pietra. Inoltre, previene le macchie e facilita la pulizia, consentendo l'uso di prodotti di pulizia anche aggressivi. Tuttavia, è sempre consigliato utilizzare prodotti neutri e spugne non abrasive.
